Subject:

**DSI 9297** 

Peter,

DSI 9297 looks good to me. I can only assume that you have picked the right bolt lengths. I have not verified this myself. You may want to get Chris or Bill to verify your rationale with physical parts in hand with respect to threads bearing on the saddles.

Assuming the bolts are good, we should carry on and get this DSI signed electronically (I can sign original on my next visit) and do the ECN thing. Do not incorporate this DSI (parts or paperwork) into the standard 664 package. Peggy needs seperate DSI9297-101 and -201 kits on the shelf shortly to accompany D212-664-101 and -201 crosstubes that she has sold to UH-1 customers. I believe she is delivering them for the middle of April, but she is the one to ask.

David
